

```

server.js > app.listen() callback
1 import express from 'express';
2
3 const app = express();
4 const PORT = 5000;
5
6 app.listen(PORT, () => {
7   console.log(`The server is up and running on Port No: ${PORT}`);
8 });
9

```

server.js

The server is up and running on Port No: 5000

```

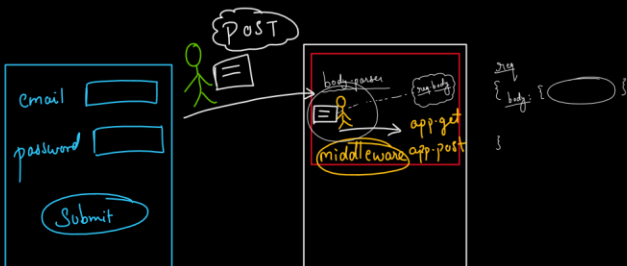

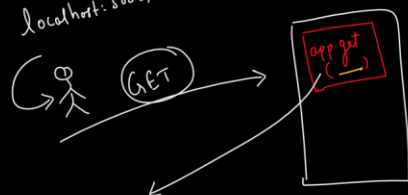

server.js > app.listen() callback
1 import express from 'express';
2
3 const app = express();
4 (alias) express(): Express
5 import express
6 Creates an Express application. The express() function is a top-level function exported by the express module.
7

```

server.js

The server is up and running on Port No: 5000

localhost:5000/
